We have a very large stock of Men's, Boys', Ladies', Misses' and Childrens Shoes, Oxfords and Strap Sandals. We have a lot of Ladies' Shoes worth \$2.50 to \$3.00 which we will close out at

Less than Half Price

Respectfully Yours

Call or Phone 25 H. PETERSEN

Do You Buy Clothes Service?

IT'S A GOOD THING to know when you buy clothes that they're going to hold their shape, and wear fully as long as you expect. So it's worth a few dollars more on the original price of a suit to get the assurance of Clothes Service.

You can buy some clothes cheaper, but none that will cost you less by the year than those made as you dictate by

ROGERS, BLAKE & CO. Tailors to Fashionable Men

I now are showing their new lines of about 400 samples, the richest selection it has ever been my privilege to handle, and they are priced no higher than most "Shelf" clothes. Yet the materials, the inner construction, and hand-needle work assures you of long service and lasting satisfaction.

We gladly show on a "money-back" if not satisfied basis.

A. E. HENDRICKSON The Merchant Tailor

SCHOOL NOTES.

Interesting News From Our Educational Institution.

The first grade pupils are very much interested in the study of "Hawthorne". The first grade now enrolls 106 pupils.

The poem "September" is being learned by the first grade.

The High school basketball team organized last Monday by electing Arthur McIntyre, manager and Will Lander, captain.

The teachers had a meeting last week and went over the school census. Trust Officer Harrington was immediately given a list of the delinquents. He became busy at once and several more pupils are now in school.

The Board of Education has voted \$75 for the purchase of physical laboratory apparatus. Action was also taken toward providing a suitable case and locker for such apparatus.

Lucile Davis, Hazel Waldron and Marie Hewitt are now enrolled as members of the eighth grade.

The 8th grade is enjoying a careful study of Hawthorne's "The Great Stone Face."

"England's Story" has been chosen as the history text book for study by the 8th grade class. The class being unusually good history students have finished the required work in United States history and the above work has been substituted.

The ball game Saturday between the 8th grade and second high school teams resulted in a score of 7 to 4 in favor of the high school team. Evidently the 8th grade boys need practice.

There is talk among the boys of the 8th grade of organizing a basketball team. That's a good idea we hope it will materialize.

Morning exercises are a pleasing feature in the high school.

The Senior English class is wrestling with Burke's Conciliation Speech.

The teachers are rejoicing over the comfortable new desk chairs.

The desks in the high school look very nice in their new coat of varnish. Many thanks to the school board and superintendent.

Basket ball is now underway. Here's to a good team!

The cake and candy sale held by the Juniors last week, netted them nearly five dollars.

Fedora-Tetu is out of school this week.

Miss Mignant spent Friday and Saturday of last week in Big Rapids.

An Explanation.

Since the death of John S. Parsons, of Maple Forest, it was believed that some person had written to the head office of the Ancient Order of Gleaners and requested that Order not to pay the death claim of Mr. Parsons. Of course the members of the family became considerably irritated and perhaps looked with suspicion upon even those who were their good friends. It was even imitated that Mrs. Sarah J. Malco had written such a letter and in order to show those who might have such an idea, Mrs. Malco has written the Supreme Secretary asking him to write the truth about the matter that she might be cleared of such unenviable aquisition. We are glad to publish the reply to her letter which will more than satisfy those who unjustly or to hastily accused an innocent person. The letter reads as follows:

August 26, 1912.

Mrs. Sarah J. Malco, Frederic, Michigan, Companion:

I am in receipt of your letter of August 19th requesting certain information regarding the claim against this Order under the policy held by our late companion, John S. Parsons. For your personal benefit and for the benefit of the members of Hardgrove Arbor and of any other parties, who may be interested in this matter, I wish to state that we have not received

Mercy Hospital is now entering upon the second year of its existence, and to encourage the citizens of Grayling, we are pleased to submit the following report of the work done during the past year:

The hospital has treated 216 patients—127 medical cases and 89 surgical cases, 21 of which were accidents, with seven deaths only.

When we consider how many of the cases are brought to the hospital in a moribund condition (four of the deaths were such) we consider our death rate a very low percentage.

We have reasons to build our hopes for the future when we rely upon the skill of our physicians, to whom we attribute our great success.

To have looked for more progress would have been presumption for a new institution in a new locality.

However, for another year or two the hospital faculty feel it a necessity to call upon the public for assistance in order to get the necessary equipments to carry on their work more successfully and progressively. For this object have the Ladies of Grayling and surrounding towns volunteered their services to carry on the "Tag Day," which will be next Saturday, September 21st.

The Ladies propose raising a fair sum to help defray the expense of putting up a small laundry building, to contain the laundry machinery; a static machine for electric treatments, also a room for contagious diseases with a necessary room for the nurse in attendance.

The basement being built in every way suitable for a roof cellar, all of which are much needed, and by combining all, reduce the cost to a very small amount.

Therefore when the Ladies are out on the streets of Grayling next Saturday, September 21st remember that they shall feel very thankful and grateful to the donors, and their smiles of gratitude shall not fail to inspire those who make the little sacrifices with the thought that it is more blessed to give than to receive.

any communication relative to the Parsons claim from you, and the writer is not aware of any information furnished by you in any form whatever regarding the condition of the health of this member at any time during his membership in the Order, or previous to the time he joined the Ancient Order of Gleaners.

You have my permission to have this letter read at your next regular meeting. I trust it will not only meet your requirements but will satisfy the beneficiary in this case that you have not furnished us with any information which would have a tendency to prejudice the Supreme Council against payment of this claim. This claim has been paid, and the voucher is no doubt in the hands of the beneficiary at this date.

Trusting I have answered your communication satisfactorily, I remain, Yours, fraternally, G. H. SLOCUM.

Notice.

Sealed bids will be received by School District No. 1 of Grayling township, at the office of Melvin A. Bates, Director, until the first day of October 1912; for the purchase of five bonds of one thousand dollars each of said school district, each dated October 1st 1912 and payable: one on April 1st 1914, and one on the first day of April in each year thereafter until the whole of said bonds are paid.

Interest payable annually on the first day of April in each year. Bids are requested at the lowest rate of interest which the bidder will accept and pay the true value of the bonds. The right to reject any and all bids is hereby reserved.

All bids shall be directed: Melvin A. Bates, Director, Grayling, Mich. School District No. 1, Grayling Township By Melvin M. Bates, Director.

Mercy Hospital Tag Day

Saturday Sept. 21

WILL BE SUBMITTED TO THE VOTERS.

Woman's Suffrage and Right of Charter Amendment.

Proposed amendments to Section 1, Article 3, and Section 21, Article 8 of the constitution will be submitted to the electors at the election to be held on Tuesday, November 5, 1912.

The effect of the proposed amendment to Section 1, Article 3, is to extend the right to vote to every woman, a citizen of the United States and of the State of Michigan, above the age of twenty-one.

The proposed amendment to Section 21, Article 8, of the Constitution is as follows:

"Section 21. Under such general laws, the electors of each city and village shall have power to frame, adopt and amend its charter and to amend an existing charter of the city or village heretofore granted or passed by the legislature for the government of the city or village and, through its regularly constituted authority, to pass all laws and ordinances relating to its municipal concerns, subject to the Constitution and general laws of the State."

The effect of the proposed amendment to Section 21, Article 8, is to give a city or village power to amend an existing charter through its regularly constituted authority without making a general revision of the old charter or framing of a new charter.

Council Proceedings.

Regular meeting of the Common Council of the village of Grayling convened at the town hall, Monday evening, Sept. 9, 1912.

Moved and supported that the clerk be authorized to order ten cars of gravel. Motion carried.

Moved and supported that the night marshal's salary be increased to fifty dollars per month.

On motion, council adjourned.

CARL A. MORRIS, Village Clerk.

Watches

It is hard to appreciate the value of a good watch until one is forced to go without one through loss or otherwise.

If you have been going without one, or are carrying a poor unreliable time piece, you do not realize what the possession of a good watch means to you.

We are headquarters for reliable time pieces at reasonable prices. So why be without one when you can buy one at prices to suit your pocket book.

If you cannot pay cash we can sell you one on the easy payment plan. Do not put off owning a good watch longer, call to day.

C. J. HATHAWAY Jeweler and Optometrist.

Entered as second-class matter at the Postoffice at Grayling, Mich., under the Act of Congress of March 3, 1879.

GRAYLING, THURSDAY, SEPT. 19

HARRIMAN raised \$240,000 for a Roosevelt campaign. He made \$62,500,000 as a result of the Alton railway stockwatering bill that Roosevelt signed as Governor of New York. The Steel Trust, of which the Harvester Trust is a part, has contributed in amounts as high as \$100,000 to Roosevelt campaigns. The Steel trusts was enabled by Roosevelt to loot the Tennessee Coal and Iron company, profits probably a billion dollars or more. Harriman is dead, but the Steel Trust will still follow, follow Roosevelt.

Correspondence

Lovells Locals.

Geo. Besonnette was in Grayling the latter part of the week.

Mrs. Chas. DeBeaux was a Lewiston business caller on Monday.

Victor Lalonde is spending the week at Detroit taking in the State fair.

Miss Bertha Bangg, a teacher in the Stevens district was a pleasant caller on Saturday.

Mrs. Houghton and Mrs. Pierce were guests of Mrs. Robert Pappendorfs on Friday afternoon.

R. S. Houghton was a Grayling caller on Monday while on his way to do some surveying in Maple Forest township.

Thos. Morris was a caller at "The Underhill" on Tuesday and expresses himself very much pleased with the beauty of the place.

John A. Shultz returned to his home in Philadelphia on Monday after spending the entire trout season at the home of J. A. Parmelee on the main stream.

Mrs. L. A. Davis left for her home in Detroit on Tuesday, accompanied by Mrs. Sullivan and children, stopping at West Branch for a short stay.

T. E. Douglas returned on Monday from a duck hunt at St. Helen. He brought only one report of a scarcity of ducks on the lake owing to warm weather.

Mrs. F. A. Phelan left on Saturday for West Branch where she will remain for the winter. Mr. Pierce remaining here until the shutting down of the shingle mill soon.

Lucas Douglas left on Tuesday for a few days visit with his parents at Johannesburg before leaving for Ann Arbor where he will take up a course of Chemical Engineering at the U. of M.

Mr. and Mrs. C. P. Nicholson, Mr. and Mrs. Bond, Mr. and Mrs. Woodhouse and Mrs. Fergusson, of Mason Mich., were guests at the Douglas hotel Monday and Tuesday of last week. The gentlemen enjoyed bass fishing on K. B. lake while the ladies took an auto trip down the river to the several club houses. All reported a fine time.

Mrs. W. L. Abbs was called here Friday on account of the illness of her sister, Mrs. Chas. DeBeaux, who is suffering from a very severe attack of asthma and whose condition does not yet show signs of improvement. Dr. Insley and Blakely are attending her and her many friends hope for better news of her in the near future.

Frederic News.

Born to Mr. and Mrs. Sidney Barbor a baby girl, Sept. 16th.

Mrs. Ed McCracken made a flying trip to Detroit last Thursday.

Gone, Mesdames Jendren and Burke to Detroit, to attend the State fair.

Miss Carrie White, a teacher at Mackinaw was called here last Friday by the death of her cousin, Frank Higgins.

Last Sunday evening Dr. Insley and family were here. Their auto went out of commission and they were taken to Grayling in some other way.

Mrs. White and sons, of Bay City were here over Sunday with her sister, Mrs. J. J. Higgins, also Mr. Ed. Higgins and wife of Wolverine and Mr. and Mrs. McClaughlin of Pinconing, were in attendance at the obsequies of Frank Higgins.

Our community was startled last week by the death of Frank Higgins. While delivering groceries, he was struck with death from heart failure. It occurred near the mill. He was brought home but could not be resuscitated. He was born Sept. 24th, 1888 and was 24 years old at the time of his death which occurred last Friday, Sept. 13. He was afflicted, more or less, during his life with heart trouble and especially during the last thirteen years. The bereaved family have the sympathy of the entire community.

While we have been kind enough to invite the people to come here and help themselves to our abundant supply of blackberries, they are not satisfied with that. Two men tried to break into Thos. Dr. Meddick's, our banker, residence. While they were at the front door who ran out the back way, one was caught, he being one of the Indian berry pickers.

Additional Local News

Don't forget we have a hospital.

If there is any criticism, first criticize privately. If that does not correct the evil, then give the light of publicity.

San-Jak is the greatest known preventative of rheumatism. A regular \$1 bottle for only 89 cents for ten days only at Central drug store. See advt.

Lost—Sunday, July 28, a jewel case containing rings and other jewelry on road between Beaver Creek and Grayling. \$300 reward offered.

E. R. Dugan, Roscommon.

The boys and girls not attending other church are requested to come out to the evening service at the Presbyterian church next Sunday evening to hear about "Boys and Girls who Have Won Out." Mr. Walton is expected to assist the choir with his cornet. It is hoped that at this service there will be not only a large attendance of boys and girls but every one else of the congregation and strangers who may be in town will be welcome.

WANTED—The Cosmopolitan Group requires the services of a representative in Grayling and surrounding territory, to look after subscription renewals, and to extend circulation by special methods which have proved unusually successful. Salary—Commission. Previous experience desirable but not essential. Whole time or spare time. Address, with references, Charles C. Schwer, the Cosmopolitan Group, 381 Fourth Ave., New York City. 9-12-w2

Frank Higgins son of J. J. Higgins of Frederic was found dead near the Walsh Manufacturing company's plant last Friday afternoon by a young man who had been picking berries. The coroner was notified and his body taken to his office. He was subject to heart trouble and it is thought must have collapsed during an attack. He was buried Sunday at Frederic cemetery. He was well liked in his home town and the funeral was largely attended by friends. The parents have the sympathy of the people of that community.

Wednesday afternoon, September 18th, 1912, the ladies of Grayling, Mich., held a meeting in the rooms of the Grayling Social Club to make arrangements for Tag Day, for the benefit of the Grayling Mercy hospital. Mrs. Geo. Alexander acted as chairman, and Mrs. M. Hanson as secretary. At this time a ladies' aid society was formed by the ladies of Grayling for the purpose of assisting the hospital in every way. The following officers were elected:

President—Mrs. F. W. Hanson.
1st Vice Pres.—Mrs. M. Hanson.
2nd Vice Pres.—Mrs. Robert Roblin.
Secretary—Mrs. C. R. Keyport.
Treasurer—Mrs. Taylor.

Two committees were formed—Advisory committee and By Laws committee and the following ladies elected:

Advisory committee:
Mrs. Geo. Alexander.
Mrs. S. N. Insley.
Mrs. Hans Petersen.
Mrs. J. K. Hanson.
Mrs. Geo. McCullough.
Mrs. R. Hanson.
Mrs. Chas. Tromble.
Miss M. Jorgenson.
Mrs. Bingham.
Mrs. Merriman.
Sister Mary Leo.

By Laws committee:
Mrs. Deckrow.
Mrs. Schumann.
Mrs. Chamberlain.
Sister Mary Leo.

Meetings are to be held the first Thursday in each month and dues are to be ten cents a month.

Why suffer with rheumatism when San-Jak will cure you.

N. P. Olson and wife left for Detroit last night on business.

Mrs. George Sorenson and mother attended the Otsego county fair.

A. C. Wilcox is attending the old soldiers reunion at Gaylord this week.

Mrs. Jas. Wingard leaves for Reed City, Monday, to visit an uncle, who is very ill.

Alfred Hanson came down from Wolverine yesterday and is at Mercy hospital.

The band played last night in the band stand. It will play Friday night if the weather permits.

Miss Gertrude Schmidt returned to her home in Bay City yesterday after spending several days with friends.

Mr. and Mrs. A. M. Lewis, Miss McPhee and Mrs. M. Hanson drove to Gaylord in the Lewis auto this morning to attend the fair.

Four members of the Michigan State Military board were on a tour of inspection in this section, last Friday and Saturday. They are looking for a suitable place for a permanent location for the Michigan National Guards.

Ladies' Taylor Made Clothes.

I have now the new line of samples for fall and winter on hand for ladies' tailor-made clothes, made by the New York Garment Co. Satisfaction Guaranteed. A. E. HENDRICKSON, 9-12-1f. Merchant Taylor.

ECONOMY IN THE BEST FEED

Nothing Gained by Purchasing Supplies for the Poultry Because They Are Cheap.

(By A. C. SYMONDS.)
No matter what food is given the fowls be sure it is the very best that can be procured. It does not pay to buy poor grain or poultry food of any kind. Some people think it is economical to buy poultry supplies because they are cheap.

The best is none too good, is a rule as applicable here as anywhere else. Only the very best grains should be selected. Only the choicest brand of beef scraps, fine cut clover, alfalfa, and other foods of this sort should be used. There is nothing that will repay one better for good care and food given them than a flock of hens. See to it then that the matter of food given them only the best be procured and only the best be fed.

Value of Charcoal.
For all kinds of digestive troubles, charcoal is one of the best remedies.

The implicit confidence that many people have in Chamberlain's Colic, Cholera and Diarrhoea Remedy is founded on their experience in the use of that remedy and their knowledge of the many remarkable cures of colic, diarrhoea and dysentery that it has effected. For sale by all dealers.

Notice.

Bates, Director, until the first day of October 1912, for the purchase of five bonds of one thousand dollars each of said school district, each dated October 1st 1912 and payable one on April 1st 1914, and one on the first day of April in each year thereafter until the whole of said bonds are paid.

Interest payable annually on the first day of April in each year. Bids are requested at the lowest rate of interest which the bidder will accept and pay the face value of the bonds. The right to reject any and all bids is hereby reserved.

All bids shall be directed: Melvin A. Bates, Director, Grayling, Mich. School District No. 1 Grayling Township By Melvin A. Bates, Director. 9-12-w2

The Men Who Succeed

as heads of large enterprises are men of great energy. Success, today, demands health. To all is to fail. Its utter folly for a man to endure a weak, run-down, half-alive condition when Electric Bitters will put him right on his feet in short order. "Four bottles did me more real good than any other medicine I ever took," writes Chas. B. Allen, Sylvania Ga. "After years of suffering with rheumatism, liver trouble, stomach disorders, and deranged kidneys, I am again, thanks to Electric Bitters, sound and well." Try them only 50c at A. M. Lewis and Co.

Notice.

Sealed bids will be received by School District No. 1 of Grayling township, at the office of Melvin A. Bates, Director, until the 25th day of September 1912, at 5 o'clock p. m., for the furnishing of all materials, labor and the construction of a school house in the village of Grayling, Michigan, in accordance with the plans, specifications for and conditions furnished therefore by Clarence L. Cowles and Geo. Mutscheller, Architects of Saginaw, Michigan.

Proposals must be addressed to Melvin A. Bates, director, Grayling, Mich., and each proposal must contain a certified check for 5 per cent of the amount of the proposal, made payable to Melvin A. Bates, which amount the contractor agrees to forfeit to said school district in case of refusal to sign contract within ten days from date of award.

The right to reject any or all bids is hereby reserved.

An indemnity bond for one half of the contract price will be required. Contractor must carry his own fire and other insurance, also he must carry liability insurance as specified in said specifications and conditions.

Plans, specifications and conditions may be seen at the office of said Melvin A. Bates, at Grayling, Mich., and at the office of said Cowles and Mutscheller in Saginaw, Mich.

SCHOOL DISTRICT NO. 1 of Grayling Township. By Melvin A. Bates, Director. 9-12-w3

Heavenly Hash Candy.

Two and one-half cups of sugar, one cup of water, one-half cup of corn syrup. Cook until it begins to string a little and becomes a little thick. Then pour half of it in with beaten white of two eggs. Cook the other half, it becomes thicker and will string like string cheese when it is done, then pour in with the part that is cooked half done and beat until real string. Pour in buttered plates, or cool. Chocolate, nuts or coconut may be used if liked.

Uncle Ezra Says

"It don't take more'n a gill of effort to git folks into a peck of trouble" had a little neglect of constipation, biliousness, indigestion or other liver derangements will do the same. If alling, take Dr. King's New Life Pills for quick results. Easy safe, sure, and only 25 cents at A. M. Lewis & Co.

Few, if any, medicines have met with uniform success that has attended the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy. The remarkable cures of colic and diarrhoea which it has effected in almost every neighborhood has given it a wide reputation. For sale by all dealers.

CHIROPRACTIC.

A scientific method of removing the cause of the disease (acute or chronic). The science of Chiropractic is based upon a correct knowledge of the brain, spine, spinal cord and the nerves emanating therefrom. By properly adjusting the great nerve center, the spine in a natural manner, with the hands—the cause of the disease is removed. Disease is caused by certain degrees of pressure on the nerves, hindering the flow of nerve force. A Chiropractor after locating the place of pressure, removes the same, thereby causing a normal transmission of nerve force from the brain to all tissues and organs of the body, thereby creating perfect health. Fevers, inflammations and congestion, often a forerunner of dangerous diseases, a Chiropractor speedily removes the cause. Stop taking drugs and avoid the knife. Most operations are unnecessary. If you are sick no matter what your ailment, may be (acute or chronic) call on me. I can prove to you the philosophy of my statements. Consultation free at office.

The ball game at Gaylord yesterday was a dandy. Laurent pitching good ball, with good support he might have won the game for Johannesburg.

This score was 4 to 0 in Gaylord's favor.

Mrs. S. Croten, of St. Charles, was visiting friends in Grayling the first of the week and left Tuesday to visit her parents, J. J. Royce and wife of Roscommon.

The Grayling band rendered a number of selections at Mercy hospital last Friday evening which were appreciated very much by the sisters, nurses and patients. Their coming was a surprise to all.

"Thelma" which was played at the Opera house last Friday was reported fine. The scenery was beautiful and the costumes were gorgeous, the whole being very much appreciated by the large audience.

Varnished pictures—Pharaoh's Horses, Arabian Horses, Horse Fair, Holy Family, Guardian Angel, Birthplace of Lincoln, Happy Family. This line of popular and well known pictures fitted in heavy 16x20 frames only 50c each, at Sorenson Bros.

Happy Mike says that Brenner's Cash store will be closed from Friday noon until Monday morning on account of the Jewish holidays. Monday they will open again and start the week with a special bargain day and wants to call attention to his ad on first page.

No morning service: The congregation will unite with the M. E. church, Christian Endeavor at 6:00 o'clock for devotional service. Topic, Believe! Believe! Believe! Believe! Believe! Believe! Evening topic, "Boys and girls who've you out." This will be the first in the "Psalm of Life series," previously announced.

An announcement of the marriage of Mr. Frank Hugh Locker and Miss Lora Sarah Kirby has reached friends here. They were married September 8th, at Alma, the home of the bride. Mr. Locker at one time occupied the Presbyterian pulpit here, preceding Rev. Fleming. They will be at home in Detroit after October 1st.

Rev. and Mrs. James Ivey returned Tuesday from the conference, held at Alpena. They will begin packing their household goods preparatory to moving to Oaksh, Wis. Mr. Ivey won't take pastoral charge of a church this year but will keep busy never-the-less in church work. He has been preaching 32 years and feels that he and Mrs. Ivey have done their duty and expect to take life easier from now on. Mr. Ivey will be succeeded as pastor of our local M. E. church by Rev. V. J. Huntington, formerly of Vanderbilt. About three years ago last spring, Mr. Huntington occupied this pulpit during the absence of Rev. E. G. Johnson, thus is no stranger in our midst. He is a young man and well liked at his former home. They will move here just as soon as Mr. Ivey and family can remove their belongings.

Hospital tag day next Saturday.

For Sale—Six cows five of them milch, and three calves. Phone 292 or inquire of Robert Baker, Grayling, Sept. 19-w3

San-Jak, the great rheumatic remedy, regular \$1 bottle for only 89 cents for ten 10 days only, at Central drug store. For particulars see advt.

Are YOU one of the unfortunate ones who was lucky enough to have Mercy hospital at your service during some time of severe sickness or accident? We wonder who will be next.

I've dread to think of it for there is surely going to be a "next" one to go there and there will be many more to follow within the next year. While we are all let's all give liberally on Mercy hospital day next Saturday.

The Grange will serve a "billed dinner" at the G. A. R. hall on Saturday, Oct. 19. There will be in connection an agricultural exhibit. All who are interested in the future welfare of the county are requested to bring their exhibits of fruit, vegetables and flowers etc. Exhibitors can dispose of their exhibits as they wish; they will have an opportunity to sell them on the grounds. The Grange choir does not ask for nor expect any donations. Everybody come and we will use you right.

BERRY OSTRANDER, Commander.

A quiet wedding was solemnized at St. Mary's Catholic church Monday morning, Sept. 16, 1912 at 5:00 o'clock by Rev. Fr. J. J. Riess, when Miss Anna Blomdin, a popular young lady of this city and Mr. John C. McClellan of Bay City were united in holy matrimony. The bride's sister Miss Blanch acting as bridesmaid and her brother, Mr. Mose Blomdin as groomsmen. The bride wore a blue suit and blue hat and carried a bouquet of white roses. The bridesmaid wearing a brown costume and hat. After the ceremony a dairy wedding breakfast was served at the home of the bride's sister, Mrs. Daniel Hoesli, after which the young couple left on their wedding tour to Bay City, Detroit, Niagara Falls and Buffalo. The out of town guests were Mr. and Mrs. Blomdin, Mr. and Mrs. Blomdin of Linwood; a sister, Mrs. F. Weaver of Johannesburg and Mr. McClellan's mother and sister from Bay City. Many of her friends were present at the ceremony. They will be at home to their many friends on Marquette ave., Bay City, West side after Sept. 19.

Additional local news on opposite page.

Meeting of School Officers.

A meeting of the school officers of Crawford county will be held at the Court house at Grayling, Saturday, Sept. 21, 1912. The meeting will be addressed by Mr. Lasher of Lansing, who plans to give proper instruction for keeping district books and making out yearly reports.

It is very essential that the officers are present at this session.

The meeting is open to any one interested in school.

9-12-w2 A. E. IRVING.

TAMING the HEAD HUNTERS of LUZON

A YEAR AGO

HE head hunters of the Philippines are being taught to go shopping. It is an important means of civilization in the mountain province of Luzon—region of lofty peaks, deep gorges and primeval forests, inhabited by a quarter of a million people who eat their meat raw, drink warm blood, and indulge in a appetite for wholesale homicide.

As a means of civilization (under the direction of our war department), trade is being developed among these wild folk. In the past it has been necessary for them to make long journeys to the coast towns, to buy salt, cloth, and other necessities. But within the

NOW

ed up. A through route for horseback travel has been nearly completed all the way from Southern Benguet to the extreme northern end of Luzon. Telegraph and telephone lines are being extended over hundreds of miles of territory, and the watch towers on lofty peaks, hitherto occupied by native sentinels on the alert for raiding bands of head-hunting foes, are deserted.

At Bontoc (capital of the sub-province of the same name), wonderful improvements are being made. Here, where half a dozen years ago no white man could have ventured without an armed escort, the men and boys are being taught brick-making and lime burning. A deposit of magnificent clay for the purpose was found near the river, with unlimited quantities of sharp sand suitable for building nearby; also limestone. Today the people of the entire village of Minao, in that neighborhood, are burning lime and furnishing it to the government of Bontoc Province. They are becoming independently rich at the business.

These facilities, with unlimited labor obtainable for nothing under the system of the ten-day tax, make building work exceedingly cheap. A large brick school house and a brick club house, as well as a building for the offices of the provincial government, of stone and brick, have been put up at Bontoc; also a prison for wild folk who misbehave themselves, and a small, but thoroughly up-to-date, hospital. A canal has been constructed incidentally to furnish the town of Bontoc with an abundant supply of pure mountain water; the hospital will be of incalculable usefulness. Most of the wild people have been willing to give up their ancient custom of eating physical ailments by human and animal sacrifices, and come to the doctor showing a touching confidence in the ability of the white man to give them help. Packages of simple remedies, with small pamphlet of directions in English and the more important native dialects are distributed among the villages; likewise large quantities of quinine and other safe and useful drugs.

A recently discovered drug has been found to be a specific for the very unpleasant tropical disease called "yaws." It happened that a Bontoc Igorot, afflicted with it, was unwilling to go to the hospital, but was compelled to do so, receiving the one injection requisite. Then he began to complain bitterly that the medicine was being put on his back, and he went about town manifesting his improved condition to all who would look. Some days later he disappeared, and the doctor was much disappointed, because he wanted him for an object lesson to convince others of the efficiency of the treatment. To the great surprise of the hospital staff, he turned up again afterward with thirteen other sufferers from "yaws," whom he had brought a distance of fifty miles from his native village, in order that they also might be cured.

In Benguet the wild people are building school houses and sending their children to them. The boys are taught to construct looms, and the girls to use them for making cloth. Each girl, on completing her course of education, takes her loom and returns to her own village, thus extending her newly-acquired knowledge of weaving to her family and friends. At Bua is an Igorot girls' school in which the pupils not only make cloth, but manufacture articles of clothing for sale. Benguet, the capital of the province, is growing by rapid strides, and new and substantial buildings are springing up on every side.

Useful plants and particularly vegetables, including the Irish potato, are being placed in the hands of the wild people. Their agricultural methods at present entail great labor with limited results. They patiently clear a forest tract with bolos, turn over the soil with primitive implements, and sow seed. Then, after a short time, the growth of weeds drives them to fresh areas, where the performance has to be repeated. What the Americans propose to do is to provide them with modern tools of husbandry, and with carabao; whenever possible.

A point by no means to be lost sight of is the fact that these wild people of Luzon are not savages of an ordinary type. Not only is their physical development superb, probably surpassing that of any other race of human beings in the world, but they are highly intelligent and even clever. Given the advantage of two or three generations of such educational opportunities as are now being afforded them by the Americans, and they will far exceed in intellectual qualifications the hill-people of Manila and other coast towns. Indeed, it does not seem at all unlikely that in the future they, rather than the Filipinos, will become the dominant race in Luzon, controlling the affairs of the island and even those of the whole archipelago. In case we should voluntarily surrender sovereignty. In the meantime, while trying to uplift them in the scale of civilization, the government of the United States is making every effort to protect them against civilization's evil influences—especially the drink and diseases which have undermined the moral and physique of so many primitive peoples on coming into contact with the corrupting Caucasians.

last few months government stores, called "hex changes," have been started at various points, and are kept supplied with everything likely to be required by the natives—the prices for goods being those current in Manila, plus 20 per cent. and cost of transportation. The stores not only sell, but also buy. They purchase baskets, wood-carvings, native weapons, and articles of native dress such as can be sold in Manila as curios, paying liberally for them in cash.

One of the seven sub-provinces composing the Mountain Province is Benguet, the capital of which, Baguio—a mile above sea level, and 175 miles due north of Manila—is the terminus of one of the most wonderful roads in the world, built by the natives with the help of American engineering skill. Extending all the way from Baguio to the sea, it is carved to a large extent out of solid rock, skirting the sides of steep mountains and crossing deep canyons in many places by suspension bridges. For most of its length it is wide enough for narrow-gauge cars, and at intervals of eighteen miles comfortable five-room rest houses have been erected for the benefit of travelers. Running at an elevation of 3,000 to 7,000 feet, it passes through tropical scenery of unsurpassed beauty, commands magnificent views, and should in the near future become a route much patronized by tourists.

The last of the Benguet Igorots to come under the jurisdiction and control of the United States government were the people of Abo, who occupied a remarkable natural stronghold—a bold peak 6,500 feet high, which juts out from the surrounding mountains, its precipitous sides defying attack. In this rocky fortress dwell the tribe, small in numbers, but warlike, working the rice paddies in the valleys below by day and seeking refuge in their eyrie at night. They preferred independence to submission. Nevertheless, being eventually overcome by force of arms, they are now very docile. Generally speaking, the Igorots are peaceably inclined. They are notably contented and cheerful, and the women have a voice in their councils, often exercising a controlling influence. Strongest in numbers of all the savage peoples and among the most law-abiding head hunters were the Ifugos. There are about 125,000 of them. Bitterly hostile to begin with, they have become warm friends and admirers of the Americans, and their services, voluntarily given, have been utilized on an extensive scale in the building of roads and trails. By their own suggestion, they submit to a labor tax which demands ten days' work per annum from each able-bodied man. Several companies of Ifugos constabulary have been organized, and do admirable service, keeping order among the tribesmen.

Equally fierce and as yet untamed to any great extent are the Kalingas. They were inveterate head hunters until recently, but have almost given up the practice. Some of them are beginning to cut their hair and dress like Christians, and quite a number of the children are learning to read and write. One small group of their settlements adopted an attitude of deference toward the Americans, and two years ago, Walter E. Hale, lieutenant-governor of that province, paid the rebels a visit. When they threw spears at him, he flung them up and handed them back with an intimation that such actions were discourteous. He told them that he wanted to be friends with them. But they replied that they did not desire to be friends, and that they intended to take his head as their first convenient opportunity.

Such was the situation of affairs up to a short time ago, when four settlements "broke the peace" and went on the warpath. Lieut. Gov. Hale, with a strong detachment of Ifugos constabulary and assisted by a force of friendly Kalingas thereupon organized a punitive expedition, attacked the rebel villages, and wiped them out, burning the houses and killing the pigs.

The situation in Apayao is especially difficult because head-hunting among the tribesmen of that sub-province is intimately connected with their religious faith. Nevertheless, the practice is being gradually stamped out, and with the help of the Igorot and Ifugos constabulary, a number of murders have been arrested and punished. There is still a considerable area over which government control has not yet been established, and which has not even been opened up by trails, to any great extent, owing to the inaccessible character of the region. One should realize, of course, that head-hunting among these people is not regarded as murder in the ordinary sense of the word. It is a field sport and a manly occupation, established by the custom of centuries as a badge of warrior.

Most troublesome and distrustful of all the tribes of northern Luzon are the Ilongots, of the sub-province of Nueva Viscaya. There are not more than 5,000 of them, but they inhabit a vast region, most of it very mountainous and almost wholly covered by virgin forest. Often their settlements are merely temporary, and they are hard to get at. Enormous distances separate their villages, which in the more remote regions continue to fight among themselves. These were the people who not long ago murdered Dr. William Jones while he was engaged in making ethnological notes among them. Nevertheless, trails are being pushed into the heart of their country, two or three government "exchanges" have been established, industrial schools are being started for their benefit, and efforts are being made to induce them to extend their agricultural operations—partly for the sake of rendering their communities more stationary.

One should realize that the continual warfare that has been going on for centuries among the tribes in the wild mountain territory of Northern Luzon has been due mainly to lack of acquaintance among the people. Every stranger being regarded as an enemy. It was a matter of course that each village should be at war with the neighboring villages, and head-hunting was an important part of the regular business of every able-bodied male citizen. The tilling of the rice paddies and sweet potato fields could be carried on with safety only under armed guard—heads of women and children being not less desirable as trophies than those of men. For doing away with this situation of affairs, the most effective means has been the building of roads and trails by which the tribes have been brought into communication with each other, thus having an opportunity to become friends. Ifugos, Kalingas and Bontoc Igorots now work side by side with pick and shovel, instead of hunting each other with head-axes.

It is, in fact, a veritable social revolution that is being accomplished. All of the Mountain Province is being literally gridironed with trails and roads, the most inaccessible districts being open-

ed up. A through route for horseback travel has been nearly completed all the way from Southern Benguet to the extreme northern end of Luzon. Telegraph and telephone lines are being extended over hundreds of miles of territory, and the watch towers on lofty peaks, hitherto occupied by native sentinels on the alert for raiding bands of head-hunting foes, are deserted.

At Bontoc (capital of the sub-province of the same name), wonderful improvements are being made. Here, where half a dozen years ago no white man could have ventured without an armed escort, the men and boys are being taught brick-making and lime burning. A deposit of magnificent clay for the purpose was found near the river, with unlimited quantities of sharp sand suitable for building nearby; also limestone. Today the people of the entire village of Minao, in that neighborhood, are burning lime and furnishing it to the government of Bontoc Province. They are becoming independently rich at the business.

These facilities, with unlimited labor obtainable for nothing under the system of the ten-day tax, make building work exceedingly cheap. A large brick school house and a brick club house, as well as a building for the offices of the provincial government, of stone and brick, have been put up at Bontoc; also a prison for wild folk who misbehave themselves, and a small, but thoroughly up-to-date, hospital. A canal has been constructed incidentally to furnish the town of Bontoc with an abundant supply of pure mountain water; the hospital will be of incalculable usefulness. Most of the wild people have been willing to give up their ancient custom of eating physical ailments by human and animal sacrifices, and come to the doctor showing a touching confidence in the ability of the white man to give them help. Packages of simple remedies, with small pamphlet of directions in English and the more important native dialects are distributed among the villages; likewise large quantities of quinine and other safe and useful drugs.

A recently discovered drug has been found to be a specific for the very unpleasant tropical disease called "yaws." It happened that a Bontoc Igorot, afflicted with it, was unwilling to go to the hospital, but was compelled to do so, receiving the one injection requisite. Then he began to complain bitterly that the medicine was being put on his back, and he went about town manifesting his improved condition to all who would look. Some days later he disappeared, and the doctor was much disappointed, because he wanted him for an object lesson to convince others of the efficiency of the treatment. To the great surprise of the hospital staff, he turned up again afterward with thirteen other sufferers from "yaws," whom he had brought a distance of fifty miles from his native village, in order that they also might be cured.

In case we should voluntarily surrender sovereignty. In the meantime, while trying to uplift them in the scale of civilization, the government of the United States is making every effort to protect them against civilization's evil influences—especially the drink and diseases which have undermined the moral and physique of so many primitive peoples on coming into contact with the corrupting Caucasians.

When Alaric the Goth was besieging Rome, years afterward, Serena was condemned to die, because she was believed to have held treasonable correspondence with the Goths, and was strangled.

This is the story of Serena's theft of the sacred necklace. Now for the verification of at least a part of it.

The house of the vestal virgin of Rome was within recent years discovered and exposed to view by the picks and spades of archaeologists. Among the statues found was one, and one only, which bore the marks of having been decorated with a real necklace, which had been violently torn away. The fastenings still existed to show its size and the positions of its great pendant jewel.

This portrait-statue dates from the fourth century, and it is not impossible that this is the very statue that Serena robbed.—Exchange.

Nearly 5,000 students from foreign countries studied at American institutions of higher learning in 1911.

VERIFIES LEGEND OF SERENA

Recent Excavations in Rome Confirm Story of Woman's Theft of Sacred Necklace.

The story is told that in the latter part of the fourth century, when the Roman world had become more or less Christianized, Serena, the wife of the great Visigoth chief, Stilicho, visited the almost deserted house of the vestal virgin at Rome, in which the

sole survivor of the once sacred sisterhood was an aged vestal. Serena, finding the treasures of the house practically unguarded, stripped from one of the sacred statues a large jeweled necklace that hung about its neck. The aged vestal could do no more than solemnly curse the intruder. The emperor Honorius, who was the son-in-law of Serena, took no steps to punish the offender.

ed up. A through route for horseback travel has been nearly completed all the way from Southern Benguet to the extreme northern end of Luzon. Telegraph and telephone lines are being extended over hundreds of miles of territory, and the watch towers on lofty peaks, hitherto occupied by native sentinels on the alert for raiding bands of head-hunting foes, are deserted.

At Bontoc (capital of the sub-province of the same name), wonderful improvements are being made. Here, where half a dozen years ago no white man could have ventured without an armed escort, the men and boys are being taught brick-making and lime burning. A deposit of magnificent clay for the purpose was found near the river, with unlimited quantities of sharp sand suitable for building nearby; also limestone. Today the people of the entire village of Minao, in that neighborhood, are burning lime and furnishing it to the government of Bontoc Province. They are becoming independently rich at the business.

These facilities, with unlimited labor obtainable for nothing under the system of the ten-day tax, make building work exceedingly cheap. A large brick school house and a brick club house, as well as a building for the offices of the provincial government, of stone and brick, have been put up at Bontoc; also a prison for wild folk who misbehave themselves, and a small, but thoroughly up-to-date, hospital. A canal has been constructed incidentally to furnish the town of Bontoc with an abundant supply of pure mountain water; the hospital will be of incalculable usefulness. Most of the wild people have been willing to give up their ancient custom of eating physical ailments by human and animal sacrifices, and come to the doctor showing a touching confidence in the ability of the white man to give them help. Packages of simple remedies, with small pamphlet of directions in English and the more important native dialects are distributed among the villages; likewise large quantities of quinine and other safe and useful drugs.

A recently discovered drug has been found to be a specific for the very unpleasant tropical disease called "yaws." It happened that a Bontoc Igorot, afflicted with it, was unwilling to go to the hospital, but was compelled to do so, receiving the one injection requisite. Then he began to complain bitterly that the medicine was being put on his back, and he went about town manifesting his improved condition to all who would look. Some days later he disappeared, and the doctor was much disappointed, because he wanted him for an object lesson to convince others of the efficiency of the treatment. To the great surprise of the hospital staff, he turned up again afterward with thirteen other sufferers from "yaws," whom he had brought a distance of fifty miles from his native village, in order that they also might be cured.

In Benguet the wild people are building school houses and sending their children to them. The boys are taught to construct looms, and the girls to use them for making cloth. Each girl, on completing her course of education, takes her loom and returns to her own village, thus extending her newly-acquired knowledge of weaving to her family and friends. At Bua is an Igorot girls' school in which the pupils not only make cloth, but manufacture articles of clothing for sale. Benguet, the capital of the province, is growing by rapid strides, and new and substantial buildings are springing up on every side.

Useful plants and particularly vegetables, including the Irish potato, are being placed in the hands of the wild people. Their agricultural methods at present entail great labor with limited results. They patiently clear a forest tract with bolos, turn over the soil with primitive implements, and sow seed. Then, after a short time, the growth of weeds drives them to fresh areas, where the performance has to be repeated. What the Americans propose to do is to provide them with modern tools of husbandry, and with carabao; whenever possible.

A point by no means to be lost sight of is the fact that these wild people of Luzon are not savages of an ordinary type. Not only is their physical development superb, probably surpassing that of any other race of human beings in the world, but they are highly intelligent and even clever. Given the advantage of two or three generations of such educational opportunities as are now being afforded them by the Americans, and they will far exceed in intellectual qualifications the hill-people of Manila and other coast towns. Indeed, it does not seem at all unlikely that in the future they, rather than the Filipinos, will become the dominant race in Luzon, controlling the affairs of the island and even those of the whole archipelago. In case we should voluntarily surrender sovereignty. In the meantime, while trying to uplift them in the scale of civilization, the government of the United States is making every effort to protect them against civilization's evil influences—especially the drink and diseases which have undermined the moral and physique of so many primitive peoples on coming into contact with the corrupting Caucasians.

THE NATIONAL DAIRY SHOW.

As shows and exhibitions are supposed to emphasize progress, to bring out by comparison new and better methods of operation, and as this is an era of close margin in business, the best minds of the country are constantly engaged in evolving low cost of production, and marketing methods. It is reasonable to expect that an industry involving a billion of dollars annually, as does the dairy industry in America, must have the best brains of the day working out improvements in the vast problems that are attached to its many branches. That this stupendous industry might receive its proper recognition among the world's activities, a few patriotic men organized this association for the purpose of holding an annual dairy show that would be a short course in dairy husbandry unequalled anywhere else, mapping out a line of work to produce an educational event that would supplement the work of our agricultural colleges, which was much to be desired in the dairy world, and each recurring show taking advantage of experience gained in the previous shows has improved until it is today somewhere near what its founders intend it shall be.

Twelve hundred to fourteen hundred head of the best breeds of dairy cattle are promised for exhibition this year, being judged by competent trained experts on type and performance, with all records of performance and cost of production available, with what is best in the arts of breeding and feeding developed by masters in the industry placed at the disposal of the visitor, and with the highest achievement of the genius of man on lines of caring for and marketing dairy products before you, the 1912 show promises to surpass all its predecessors, and it would indeed be a laudable who would not justify time and expense of attendance upon this great show. Within its portals the mid-timer can gain most useful knowledge for his dairy farm activities, and a beginner can equip himself with the groundwork for embarking upon a successful dairy enterprise. The handful of men who commenced this show, have been supplemented by several hundred others from all over the country who from contact were convinced of the integrity of purpose of its founders and desired to become identified with the work undertaken. As success each year crowns the efforts of the management, the feeling takes root with the dairy people that this show should be the mecca to which all men interested in dairy progress should make an annual pilgrimage and bring their fellows with them in goodly numbers.

This is the most for exchange of experiences and ideas that have made or broke those following the lines disclosed. It is the mart where all that is best in dairying, be it breeding, feeding, fitting, for show yard, or developing to the highest standard of production for market purposes is discussed; where all that is modern in farm and dairy machinery is displayed in practical manner. Here the east meets the west, the younger rubs elbows with the veteran. In fact, no fair or exposition can hope to attain the value and importance that this exposition has attained. It stands today honestly administered for the dairy industry as a whole. It knows no breed or interest above another and is the highest exponent of all that is best in dairying. The seventh annual show, better equipped, with all features of merit amplified, new and instructive features added in the government educational exhibit, no matter what character of stock raising he is engaged in a day or two spent at the show must be helpful to the man who wants to advance in his methods and make more money from his farm. It is a farmer's show, the less pretentious scale you farm on the more need you have of its teachings. The railroads are doing a great work along their respective lines and they, together with the agricultural and dairy press, are rendering valuable support to this show. This show is held in Chicago every year. This year October 24 to November 2. Adv.

"This Is My Choice of Duke's Mixture Presents"

Among the many valuable presents now given away with Liggett & Myers Duke's Mixture there is something to suit every taste—and in this all-pleasing satisfaction the presents are exactly like the tobacco itself. For all classes of men like the selected Virginia and North Carolina bright leaf that you get in.

Liggett & Myers

Duke's Mixture

Now this famous old tobacco will be more popular than ever—for it is now a Liggett & Myers leader, and is equal in quality to any granulated tobacco you can buy. If you haven't smoked Duke's Mixture with the Liggett & Myers name on the bag—try it now. You will like it, for there is no better value anywhere. For 5c you get one and a half ounces of choice granulated tobacco, unsurpassed by any in quality, and with each sack you get a book of cigarette papers FREE.

Now About the Free Presents

The coupons now packed with Liggett & Myers Duke's Mixture are good for all sorts of valuable presents. These presents cost you not one penny. The list includes not only "smokers' articles"—but many desirable presents for women and children—fine fountain pens, umbrellas, cameras, toilet articles, tooth brushes, cut-throat razors, gloves and masks, etc.

As a special offer during September and October only, we will send you our new illustrated catalogue of presents FREE. Just send name and address on a postal.

Coupons from Duke's Mixture may be secured with tags from HORSE SHOE, KINGSLEY'S NATURAL LEAF, GRANGER TWIST, coupons from LIGGETT & MYERS CUT, FREEMONT CIGARETTES, CLIX CIGARETTES, and other lists, or you may get them from the Premium Dept.

Liggett & Myers Tobacco Co.
St. Louis, Mo.

NEW HOMESTEAD LAW—

Full Title to 320 Acres in Three Years

IN THE GREAT NORTHWEST

New law makes it easy to acquire 320 or 160 acres. Also wonderful opportunities in sale of 300,000 acres fertile Montana state lands at low prices. Terms: 15% down, balance in 20 years. Crops this year bigger than ever!

LOW FARES VIA GREAT NORTHERN RY.

Sept. 25 to Oct. 30. \$33 from Chicago to many points in Montana, \$38 to Idaho, Washington, Oregon and North Pacific Coast points. Liberal stopovers.

Tickets on sale daily, Sept. 25 to Oct. 10. For Colonel Frider and detailed information, fill out the coupon and mail to:

E. C. LEEDY

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One lb. package colors all blues. They dye in cold water better than any other dye. You can dye any garment without rinsing apart. Write for free booklet—10c to 15c. Bunch and Co. Colors. DONOR DRUG COMPANY, Quincy, Ill.

Whenever You Use Your Back

Use Doan's Kidney Pills. This good remedy cures bad kidneys. A TYPICAL CASE—

W. M. Richardson, Warren, Indiana, says: "For ten years I couldn't work. My back was aching, my kidneys failed me. The rheumatism pains were terrible. I tried many pills, but they didn't help. I got Doan's at my drug store. Now I am a well man."

Doan's Kidney Pills. Technical. Antioch—How did you escape a fine? Motorist—Our attorney proved the constable's watch was fast. Judge.

No thoughtful person uses liquid blue. It's a pinch of blue in a large bottle of water. Ask for Red Cross Ball Blue, the blue that's all-blue. Adv.

Unhindered. "Yes, sir, the cause of woman suffrage is going to advance with gentle strides from now on."

"Going to discard the flannel skirt, eh?"

American Tools Preferred. A favorite sport in New Zealand, as also in Australia and Tasmania, is competition in wood chopping and sawing.

Obbliging. A young man who had never testified before was called before the court as a witness in a certain case.

A Pen and Ink Snakepeare. Woodrow Wilson, on a recent visit to Atlantic City, referred good humoredly to his rather illegible handwriting.

"But my hand is nothing," he said "to that of George Greasley."

"Poor Greeley once quoted from Shakespeare in a leading article. 'His true, 'tis pity, and pity 'tis 'tis true.' This appeared next day."

"His two, 'tis fifty, 'tis fifty, 'tis fifty-two."

The Educational Stepladder. We know what kindergarten is for; it is to educate children for the primary grades.

We know what the primary grades are for; they are to educate children for the grammar grades.

We know what the grammar grades are for; they are to educate children for high school.

We know what the high school is for; it is to educate children for college.

But what does college do for you for life.

Old Roman Wall Unearthed. A part of the wall, which once enclosed old St. Paul's, London, has been discovered in excavations at the corner of Paternoster Row and St. Paul's alley in London.

The wall, which is about 60 feet long, is made of chalk and rubble, and was built in the twelfth century. On the same site pieces of a Roman amphora, Roman vases and some Samian ware have also been found.

Other finds include a camel's skull unearthed in High Holborn and a large quantity of pipes of the eighteenth century.

Under some old stables in Fitzrovia, London, three Norman arches have been found. They are close to one another, and are believed to have formed part of the cloisters of the priory which once stood on this site.

RIGHT HOME. Doctor Recommends Postum from Personal Test.

No one is better able to realize the injurious action of caffeine—the drug in coffee—on the heart than the doctor. Tea is just as harmful as coffee because it, too, contains the drug caffeine.

When the doctor himself has been relieved by simply leaving off coffee and using Postum, he can refer with full conviction to his own case.

A Mo. physician prescribes Postum for many of his patients because he was benefited by it. He says: "I wish to add my testimony in regard to that excellent preparation—Postum. I have had functional or nervous heart trouble for over 15 years, and a part of the time was unable to attend to my business."

"I was a moderate user of coffee and did not think drinking it hurt me. But on stopping it and using Postum instead, my heart has got all right, and I ascribe it to the change from coffee to Postum."

"I am prescribing it now in cases of sickness, especially when coffee does not agree, or affects the heart, nerves or stomach."

"When made right it has a much better flavor than coffee, and is a vital sustainer of the system. I shall continue to recommend it to our people, and I have my own case to refer to."

Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in plain, "There's a reason."

Never read the above letter? A new one appears from time to time. They are all free, and full of human interest. Adv.

PARALLEL STORIES OF FAMOUS CRIMES

By HENRY C. TERRY

THE CRIMINAL Tells How He Planned the Deed and Sought to Close Every Avenue of Knowledge Leading to His Guilt. The Detective Shows How Futile These Efforts Were and How the Old Adage, Murder Will Out, Always Holds Good.

(Copyright by F. L. Nelson)

THE LOOT OF THE KINGSTON NATIONAL

I HAVE often wondered what Mr. Sherlock Holmes or Monsieur Lecoq would have done if confronted with the problem of the robbery of the Kingston National. The detective of fiction, you say, is never realized in real life. Here is a story that proves the opposite. I doubt if either of the famous sleuths of Doctor Doyle's or Gaboriau's imagination would have proceeded more ingeniously or more successfully to the final unraveling of the tangle than did Detective Price. The only difference is that the writer of detective fiction would first build up the mystery and then proceed toward the solution, while the tale came to my ears first with Willy Mitchell's story of the laying of the plot and then with Price's account of the wrong clue that led smash up against the cashier. Then came the insignificant bit of wax that broke down the elaborate tissue of speculation.

WILLY MITCHELL'S YARN

"A crook who is up to snuff," said Willy Mitchell, who is noted among other things for having been tried and acquitted three times for murder, "and wants to get along in the business without working too much for the state, must be like a good general. He must always arrange his plans so as to cover his retreat. I know about all the top-notch thieves in the country, and I have noticed a singular defect in most of them."

Some thieves are so constituted that they do not mind going to jail for a five or so. Punishment of that sort has no terrors for them; and while liberty is sweet to every man, they see their meaning and rather enjoy prison life. I always had a horror of going to prison, but it was never quite strong enough to lead me to become honest. When the big door closed behind me every time that I entered jail it gave me a chill, and I never got over it until I was out in the sunshine again."

"So it naturally happened that when I was in active business, it was my special desire to do everything in my power to keep out of jail. I always paid a great deal more attention to laying plans for a getaway after a robbery than to the work itself. For that reason I used to get into quarrels with the men I worked with."

"They did not like my caution, and I have pulled many times out of what looked easy jobs just because I could not see my way clear to escape. It was my notion that any bit of work would not pay, no matter how much money there was in it, if it were followed by a ten-years' contract with the state in the stone-breaking line."

"It was this trait of mind which led me into the Kingston National bank robbery. At the time when I ran against this trick I was a fugitive from justice, with the charge of killing Ned Wallace hanging over me, so, naturally, I had to go a bit slow. There was no doubt about my killing Ned, but I had to do it to save my own life. I knew that I would be acquitted if I were pinched and held for trial; but I hated to go through it all, and I made up my mind that the best way out of it was to keep under cover until the clouds blew away. I got over to Kingston where I had a solid friend, and in my trips about the place I struck the bank."

"My attention was attracted to the bank by a story in one of the papers about a large sum of money which had been deposited in its vaults by some company that was going to build a railroad and a water works. I knew that this money was going to remain in the bank for several weeks, so I sent for Bill Noble, who was at that time running a gambling house in East Houston street, near Broadway. Bill was always ready to take a hand with me because he understood my ways and I did his, and we never had any trouble. It was just what Bill wanted, for his bankroll had been hit very hard. I had not been out of the house in the daytime because the murder of Wallace was very hot, and I knew that the coppers were making a lively chase for me. I arranged with Bill for him to do all the preliminary work. He turned a book agent on short notice, which gave him a chance to visit the bank without exciting suspicion."

"I don't remember what book it was that Bill was selling, but he did such slick work that the clerks bought all his stock, and he had to get more books to fill the orders, just to make it appear all straight."

"While Bill was talking books he sized up the vault, and saw that the door was an old-fashioned affair, with a new and intricate lock, which had just come out, and was believed to be burglar-proof. Bill got everybody's phiz in the bank firmly fixed in his mind, and the signs on the desk in front of them indicated the part of the business that each man looked after."

"The next step was to find out who closed up the vault. This was a very delicate thing to pick up without being inquisitive. The fact that Bill had

to deliver some more books at the bank opened the way to get this information. He kept tab on the bank for several days, and found out the time that each man left, but he could not see from the street who had charge of the vault. When the books came Bill waited until banking hours were over before going to deliver them. He found several of the clerks busy closing up the books, and he showed that he was a genuine book agent by starting in to talk against time. Bill knew what he was after, and he got it, after waiting an hour. Bill saw that the cashier, whose name was Bell, looked up the vault. He used two sets of keys, one for the inner door to the small safe and the other for the big iron outside door. He put the keys in different pockets. Bill was close enough to the keys to remember them if he saw them again. Bill followed the cashier to his home, which was in the suburbs, in a neat two-story cottage, and the preliminary work was over."

"If it would have been easy to take the next step, which would be to get the keys and open the safe. That is what some thieves would have done, but I had a better trick up my sleeve, which came out of my caution, and would aid us in making escape easy. It was developed in this way: The same night Bill found out about the keys, we made a call at Cashier Bell's house after the family had retired. We did not care to disturb their slumbers, so we entered the house through a parlor window. Bill had located the room in which the cashier slept, and went there noiselessly. Either the cashier or his wife had a beautiful snore, and I need not have been so careful in my operations. I found the cashier's trousers, removed the keys and returned to the street, where I was waiting."

"We went to a secluded spot where it was safe to flash a lantern. There I took a careful impression of the vault keys and the key of the front door of the bank in wax, and all the measures necessary. I then returned to the cashier's house and replaced the keys in his pockets just as I had found them. We closed up the house and went home."

"I immediately went to work on the keys. They used to say I was the best keymaker in the world. It took me about a day to file the keys."

"The night after we had called on Cashier Bell, Bill and I paid a visit to the bank about two o'clock in the morning, when we knew the police man on the beat was taking a snooze in a hazy way."

"The keys worked like a charm. Five minutes after we entered the bank I was inside the vault packing up the green stuff. I took all the money and such bonds as appeared to be negotiable. I worked about twenty minutes closed the doors of the vault and walked out with \$240,000 in my arms. We were in time to connect with a freight train. After riding about ten miles we left the train, crossed the Hudson to Rhinebeck, and took the first train to New York."

DETECTIVE PRICE'S STORY.

"Mistakes are something that cannot be avoided," said Detective Price, "no matter how careful you may be. In probably no other business are mistakes made so often as in police work, and we are frequently unjustly criticized and condemned."

"I speak in this way because of my recollection of the pounding I received when investigating the robbery of the Kingston National bank. I know that I did not deserve all that I got, but a great many people thought I was not abused half enough."

"I was put to work upon the case the day the robbery was discovered, which was on a Monday morning. A very singular state of things was found at the bank when Cashier Bell threw open the doors of the vaults to begin the day's business. All the clerks were present at their desks, the books were kept in order, and the which was in charge of the head book keeper. The cashier entered the vault with a key and came out with a bag full of money in his desk. A moment later he staggered out and fell into a chair. He was not able to speak for a moment. The clerks gathered around him, thinking he had an attack of heart failure, to which he was subjected. He announced when he got control of himself, that there was no money in the vault, but he did not say that there had been a robbery."

"After a short consultation, the bank was closed for the day, and everything was just as it had been found when I got there. I made a careful examination of all the windows and doors. There was no sign that thieves had forced an entrance. The vault, according to the statement of Cashier Bell and all the clerks, was locked when they reached the bank. The paint on the doors had not even a slight scratch to show that they had been tampered with. The deeper I went into the affair the more mysterious it became. I made up my mind that some one had robbed the bank who was perfectly familiar with the safe and the methods of doing business."

"I had a private consultation with the president and directors, and got from them the history of every man who worked in the bank, so far as they knew it. Every employee had a good reputation, was prominent in social and church affairs in the town, and had been with the bank for many years."

Home Town Helps

MUST BEGIN PLANNING EARLY

The City Beautiful is a Matter of Wise Thought Extending for Many Years.

In the awakening to the imperative need of a different and better method of city making America is following the precedent of other nations. Continental European cities decades ago, and English and South American cities more recently, changed radically their municipal regulations and their methods of building cities. The splendid results of their activity are now apparent to every citizen and visitor. In the cities of Germany especially the results are large and convincing. Transportation and highway systems, water fronts, harbors and docks, industrial and commercial development, public recreation, better homes, particularly for families of small means—such great municipal subjects as these have been handled with skill and experience supported by law and public authority.

There are many misconceptions current about town and city planning, but none is further from the fact than the notion that comprehensive plans are only for large cities. The reverse is nearer the truth. In big cities the conditions are comparatively fixed and unyielding. Comprehensive planning, especially with our present limited city charters and the hampering laws of our states, can have only narrowly limited influence in larger places, relieving only the worst civic conditions, ameliorating merely the most acute forms of congestion, correcting but the gravest mistakes of the past. Wide municipal planning, three-planning, as far as our American cities are concerned, must be confined for the present mainly to the extension of those cities and to the betterment of what are really separate communities on the outskirts.

But with small cities with a population ranging from 2,500 to 100,000, the case is different. Comprehensive planning or replanning may be to them of far-reaching and permanent service. There is scarcely anything in the smaller places that may not be changed. In small cities, for example, railroad approaches may be set right, grade crossings eliminated, water fronts redeemed for commerce or recreation or both, open spaces acquired even in built-up sections.

A satisfactory street plan can be carried out and adequate highways established; public buildings can be grouped in at least an orderly way, and a public system of parks, well distributed and well balanced public grounds can be outlined for gradual and systematic development. All of these civic elements, indispensable sooner or later to a progressive community, may be had in the small city with relative ease and at slight cost.

INFLUENCE OF TROLLEY CARS

Have in Large Measure Annihilated Distance and Made Comfortable Living Easier.

In days of old cities were developed somewhat compactly, for business was transacted in the immediate presence of the principals. Then came in the telephone, making possible easy and quick communication between distant points. This influence alone tended to the spread of city areas so far as business districts were concerned, but it has remained for the trolley car to practically annihilate distance so far as residence is concerned. This has resulted in figuratively bringing the country into the city, for once may come to the center of Los Angeles from many points without the amount of time and money which in the past would have been required. Other examples of the same point from some parts of the city proper. One may even come as quickly from Santa Ana or many of the beaches. Thus has the trolley car made a great change in the growth of the land, both in city and country—Los Angeles Times.

Sand for Children's Playgrounds.

The writer would much like to see towns, villages and the smaller centers of population furnish sand-piles for the children. A few loads of sand would cost but little and mean much to a considerable number of children. The local schoolyard might easily be used for vacation playing and the sand-piles built there. The school trustees would even be justified in furnishing the sand from the general fund. It is the duty of public officials to see that the children get all the freedom and enjoyment possible and the free range of the school grounds, together with an ample pile of sand, will do much for the little ones.

Proportionate Park Areas.

The city of London has reserved a little more than 20 per cent. of its area for park purposes, or 7,544 acres out of a total of 34,000 acres contained in the county. These figures do not include a number of parks within the very large of the metropolis, some of them very large in size. Richmond contains 2,469 acres and Epping Forest 6,552 acres, and both are immediately contiguous to the city, making a total of more than 10,000 acres reserved for the pleasure of Londoners' millions. Few important cities are so well provided with public parks.

Spelling Children.

Little children, give their mother the headache, but if she lets them have their own way, when they grow up to be great children, they will give her the headache. Fondness spoils many, and letting little faults alone spoils more. Gardens that are never weeded will grow very little worth gathering. All watering and no hoeing will make a very bad crop. A child may have too much of its mother's love and in the long run it may grow out that it had too little. C. H. Spurgeon.

Good Ironing Board.

A small ironing board may be made from an ordinary board. Covered with flannel and a piece of old sheeting, it will be found useful either for the dressmaker or for pressing fine handkerchiefs and jabots.

Thus has the trolley car made a great change in the growth of the land, both in city and country—Los Angeles Times.

Sand for Children's Playgrounds.

The writer would much like to see towns, villages and the smaller centers of population furnish sand-piles for the children. A few loads of sand would cost but little and mean much to a considerable number of children. The local schoolyard might easily be used for vacation playing and the sand-piles built there. The school trustees would even be justified in furnishing the sand from the general fund. It is the duty of public officials to see that the children get all the freedom and enjoyment possible and the free range of the school grounds, together with an ample pile of sand, will do much for the little ones.

Proportionate Park Areas.

The city of London has reserved a little more than 20 per cent. of its area for park purposes, or 7,544 acres out of a total of 34,000 acres contained in the county. These figures do not include a number of parks within the very large of the metropolis, some of them very large in size. Richmond contains 2,469 acres and Epping Forest 6,552 acres, and both are immediately contiguous to the city, making a total of more than 10,000 acres reserved for the pleasure of Londoners' millions. Few important cities are so well provided with public parks.

Spelling Children.

Little children, give their mother the headache, but if she lets them have their own way, when they grow up to be great children, they will give her the headache. Fondness spoils many, and letting little faults alone spoils more. Gardens that are never weeded will grow very little worth gathering. All watering and no hoeing will make a very bad crop. A child may have too much of its mother's love and in the long run it may grow out that it had too little. C. H. Spurgeon.

Good Ironing Board.

A small ironing board may be made from an ordinary board. Covered with flannel and a piece of old sheeting, it will be found useful either for the dressmaker or for pressing fine handkerchiefs and jabots.

Home Town Helps

MUST BEGIN PLANNING EARLY

The City Beautiful is a Matter of Wise Thought Extending for Many Years.

In the awakening to the imperative need of a different and better method of city making America is following the precedent of other nations. Continental European cities decades ago, and English and South American cities more recently, changed radically their municipal regulations and their methods of building cities. The splendid results of their activity are now apparent to every citizen and visitor. In the cities of Germany especially the results are large and convincing. Transportation and highway systems, water fronts, harbors and docks, industrial and commercial development, public recreation, better homes, particularly for families of small means—such great municipal subjects as these have been handled with skill and experience supported by law and public authority.

There are many misconceptions current about town and city planning, but none is further from the fact than the notion that comprehensive plans are only for large cities. The reverse is nearer the truth. In big cities the conditions are comparatively fixed and unyielding. Comprehensive planning, especially with our present limited city charters and the hampering laws of our states, can have only narrowly limited influence in larger places, relieving only the worst civic conditions, ameliorating merely the most acute forms of congestion, correcting but the gravest mistakes of the past. Wide municipal planning, three-planning, as far as our American cities are concerned, must be confined for the present mainly to the extension of those cities and to the betterment of what are really separate communities on the outskirts.

But with small cities with a population ranging from 2,500 to 100,000, the case is different. Comprehensive planning or replanning may be to them of far-reaching and permanent service. There is scarcely anything in the smaller places that may not be changed. In small cities, for example, railroad approaches may be set right, grade crossings eliminated, water fronts redeemed for commerce or recreation or both, open spaces acquired even in built-up sections.

INFLUENCE OF TROLLEY CARS

Have in Large Measure Annihilated Distance and Made Comfortable Living Easier.

In days of old cities were developed somewhat compactly, for business was transacted in the immediate presence of the principals. Then came in the telephone, making possible easy and quick communication between distant points. This influence alone tended to the spread of city areas so far as business districts were concerned, but it has remained for the trolley car to practically annihilate distance so far as residence is concerned. This has resulted in figuratively bringing the country into the city, for once may come to the center of Los Angeles from many points without the amount of time and money which in the past would have been required. Other examples of the same point from some parts of the city proper. One may even come as quickly from Santa Ana or many of the beaches. Thus has the trolley car made a great change in the growth of the land, both in city and country—Los Angeles Times.

GETTING FOWLS READY FOR FALL

Pullets Should Be Fed by Them-selves as They Will Do Better and Grow Much Faster.

As soon as the sex can be determined, it is well to put the pullets by themselves. They will grow faster and do better. In fact, they should be fed differently from the cockerels, for you will want to get them in shape for early egg production.

Now, it is not well to force them prematurely into egg production, but it is best to get them in condition so that they will begin to lay in the fall. This is the best time for it, for it is then that you will get the highest prices for eggs. If you have a few pullets that are laying during the fall and early winter, you will get splendid returns from them.

These pullets, as soon as separated, should be given a clean house and kept free from lice. If you find when making the division that some of them have lice, it should be well to powder them and put them all in a small house, where you can attend to them before putting them in their regular quarters. Feed plenty of grain and

beef scrap, and keep oyster shells before them.

They will come along nicely when away from the annoyance of the cockerels, and after they have become used to their new home and see one another, they will grow like weeds, and soon look like mature birds.

The Discarded Vegetables.

A variety of food will stimulate the hen to her greatest egg production. The small potatoes and other vegetables that are not suitable for human food can be fed to the chicken, to splendid advantage. If you feed like making their ration unusually appetizing just bolt these up and mix enough bran or shorts to make a comparative dry mash.

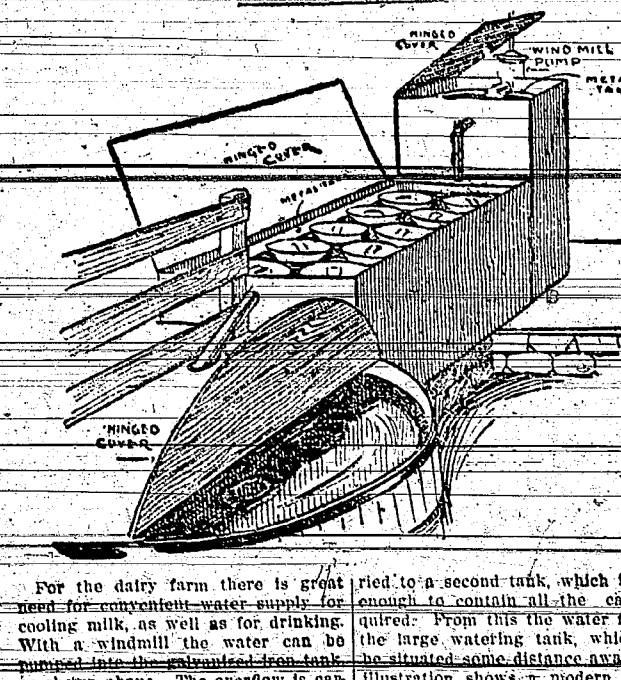

Pasture Was Lacking.

Sometimes it isn't the seller's fault when a cow doesn't come up to advance notices. An old Quaker sold a cow and some time afterward the buyer complained she was not yielding the promised amount of milk. "There should have been much more pasture," was the Quaker's significant reply.

Keep the Young Stock.

Some farmers stand in their own light by selling off the thrifty young stock that is worth just as much to them as to the buyer.

WATER SUPPLY IS CONVENIENT

For the dairy farm there is great need for convenient water supply for such things as milking, washing, cooling milk, as well as for drinking. With a windmill the water can be pumped into the only convenient tank, as shown above. The overflow can be

ried to a second tank, which is large enough to contain all the water required. From this the water flows to the large watering tank, which may be situated some distance away. The illustration shows a modern system.

AUTOLOADING RIFLE

All the advantages of the big game arm with none of its discomforts or annoyances.

The recoil does the work of reloading and ejecting instead of pounding your shoulder. Five shots—just pull and release the trigger. Your action stays open and warns you when it's time to shove in a fresh clip. You can never get in a tight place—the gun never clogs. Each shot strikes a one ton blow.

Simple action—simple take-down.

Send for a motion picture booklet explaining the Remington-UMC Autoloading Rifle's big points.

Remington-UMC Metallic Cartridges combine the highest velocity with the greatest shooting accuracy.

Made in all calibers for every standard firearm.

When Remington-UMC cartridges are used, the arm is guaranteed to the full extent of the manufacturer's guarantee.

Remington-UMC—the perfect shooting combination.

Remington Arms-Union Metallic Cartridge Co. 239 Broadway New York City

SUCCESS FOR HOSTESS

LITTLE MATTERS IN WHICH TACT COUNTS FOR MUCH.

Choose Your Guest as You Would Shoes, Because They Fit—Learn the Art of Switching the Conversation.

You may have a dinner with the best appointment and cuisine, and if your guests are badly chosen the dinner will be a social failure.

Certain elements will not coalesce, and the woman who tries to force the process is courting an explosion. Choose guests as you would shoes—because they fit.

You may be catholic in your taste and enjoy the butterfly without a brain and the woman who is all brain without social grace, the artist or musician, the snob who distrusts all the clever coterie, the man who loves a gay story and the woman who is easily shocked.

But gather those friends around a common board and you may count on their boredom.

If you must have a mixed dinner, pray for tact in the seating. "A man cures what he eats," a woman cures whom she sits next.

Never seat your guests according to social position. The practice makes neither the dinner nor the hostess popular. If you put the socially unimportant together, your entertaining will never be a success.

Custom has it that those who sit on the right and left of the host and hostess may feel themselves singled out for attention—but choose for reasons. Do not give your guests a chance to gibe at you as a money worshipper or one with an axe to grind.

Do not have dinners so large as to prevent general conversation. Not all who go out to dinner are blessed with manners, and the hostess should have it in her power to go to the rescue of the guest who is neglected by her neighbors.

Nor should your dinners be long or heavy. The day of dozens of courses is past; the most brilliant dinner-out now is hard to shine when eating through an over-elaborate menu.

Learn the art of switching the conversation. Many a dinner is wrecked because the hostess does not know to stop an argument that is verging on controversy, and has not the social sense to vent dangerous topics or sidetrack the bore.

Encourage brilliancy and gaiety, but keep a sharp watch for high stings and jokes that tend to license.

VALUABLE LITTLE SWEET BOX

Is Easily Made and Its Usefulness Will Commend It to the Housekeeper.

A "sweet box" has become an institution in our family. It consists of a stout cardboard box, lined with a sheet of wadding generously sprinkled with a favorite sachet powder. The wadding is glued over the top edge, thus making the cover fit tightly. It contains five or three loose, very sweet sachets. Any little gift or bit of which is laid away for a day or two in the sweet box with a sachet between its folds, comes out deliciously perfumed. All through the year we find many things are sweetened that would not be, were it necessary to hunt up or buy sachet powder each time.

A Nice Sirup.

Put two tablespoons sugar in a frying pan and place over a hot fire. Stir constantly until sugar is melted and browning, being careful not to let it burn. When melted and browned, pour enough boiling water over it to cover the sirup and let it boil until, when a small quantity is cooled, it will be as thick as a common sirup. Take from the stove and pour into a pitcher. Flavor with vanilla or maple essence, if desired. This will keep and will not sugar unless boiled too long.

Beef En Casserole.

Two and a half pounds beef, chick or round; three pounds beef drippings, one carrot, cut in dice; one onion, sliced; one tablespoon flour, salt and pepper, one cup strained tomatoes, half bay leaf. Salt and pepper meat and dredge with flour. Heat fat in a pan. Brown meat on all sides. Place meat in casserole or earthen baking dish, add all ingredients, cover, and place in oven and cook until tender. Serve with mashed or baked potatoes.

Cinnamon Cake.

Take the yolks of six eggs, six table-spoonfuls of sugar, and a small teaspoonful of ground cinnamon and put them all into a basin. Beat the mixture for half an hour without changing the direction, and at the end of that time add to it the six whites of eggs beaten to a stiff froth. Stir in six table-spoonfuls of flour and bake the cake in a moderate oven in a fat greased tin.

Prepared Mustard.

Put three table-spoonfuls of ground mustard into a bowl, pour over it enough warm water to make a stiff paste and rub smooth. Add one-half cup vinegar, one table-spoonful sugar, a pinch of salt, and the beaten yolks of two eggs. Set the bowl into boiling water and stir the mixture until it thickens; then add a lump of butter about the size of an egg.

A vast amount of ill health is due to impaired digestion. When the stomach fails to perform its functions properly the whole system becomes deranged. A few doses of Chamberlain's Tablets is all you need. They will strengthen your digestion, invigorate your liver, and regulate your bowels, entirely doing away with the miserable feeling due to faulty digestion. Try it. Many others have been permanently cured—why not you? For sale by all dealers.

POULTRY

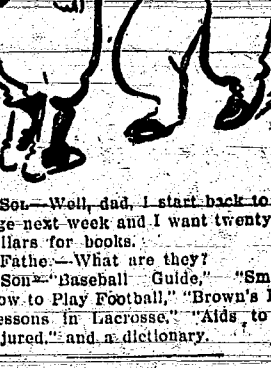

FAVOR INDIAN RUNNER DUCKS

Hardest of All Domestic Fowls and Do Equally as Well Confined as on Free Range.

Indian Runner ducks are the hardest of all domestic fowls. As they do equally well in confinement or on free range, they may be profitably kept by persons in town or city as well as by farmers. They do not require pond or running water—just water to drink in, something deep enough so the whole head can be immersed, says the Interstate Poultryman. They may be kept more cheaply on free range, as they will find many things of little or no value, such as bugs, worms, grasshoppers, grass, etc. These they convert into large white eggs, which if not sold for hatching will command several cents above the market price of hen eggs and at Easter will bring twice as much. They do not differ in flavor from hen eggs, but are superior for all kinds of cooking. As a table fowl, the Indian Runner duck is excellent. The meat is tender, juicy and fine-grained. Thus far the demand for breeding stock and eggs for hatching has been so great that the duck has not been raised to a great extent as a market stock; but wherever it has become known as a table fowl it is wanted.

As egg-producers the Indian Runner females are too valuable to sell on the market until from three to nine years old. A flock from a good laying strain will average from 240 to 250 eggs per layer per year, if properly managed. I find by actual test that the feed that will keep a Plymouth Rock hen in good shape will keep a Runner duck plump, so I think it safe to say that they can be kept as cheaply as any of the large breeds of hens in winter and cheaper in summer if on free range, as they will forage farther into the fields. We like them much better than hens, as they do not destroy crops, neither are they so much of a nuisance around the buildings as hens. The ducklings of this breed can be raised to a marketable size cheaper and more quickly than those of any other breed. The ducks never set, the ducklings must be hatched by incubators or hens. Hens give the best results, often hatching every egg given them. The eggs are very fertile and may, if desired, be hatched any month in the year. Ducklings hatched in June or July often lay all winter, while if hatched in March, they will lay in time to hatch ducklings from them by the 1st of October.

HIS IDEA OF QUALIFICATION

Willie—Say, pop, did you ever kill a bear?

Papa—Oh, yes, I have killed a great many.

Willie—Then I guess you'll be president some day.

PROBABLY

First Hobo—I wonder what a palmetist would say if he examined my hand.

Second Hobo—That your name was mud.

THE CAT GOT HER

First Mouse—Where is your sister?

Second Mouse—Don't ask me. "Boo-hoo-boo-hoo. Go ask the cat."

HADN'T PROVEN FRIENDSHIP

"Isn't he a good friend of yours?"

"I'm afraid not; he has never tried to borrow money of me."

What We Never Forget.

According to science, are the things associated with our early home life, such as Bucklen's Arnica salve, that mother or grandmother used to cure our burns, boils, scalds, sores, skin eruptions, cuts, sprains or bruises. Ointment of sweet grease, its merit. Unrivalled for piles, corns or cold sores. Only 25c at A. M. Lewis & Co.

PLAN FOR A HEN HATCHERY

Door Placed in Front of Each Nest, Hinged With Leather and Held by Wooden Cleats.

Here is my plan for a successful hen hatchery. I think it is for a hundred and make stalls for 12 hens, which makes the nest boxes 12 inches over 14 inches wide, writes J. A. Grandall of Norwich, Kan., in the Farmers' Mail and Breeze. Slats and thin lumber may be used for the 12 partitions. Floor the nest department. Chicken wire is used to cover the top of runs except for the doors A, each of which is 28 inches long, enough to cover two runs. The doors B are the same length. There is also a door C, 10 inches in the front of each nest box and all doors are hinged with leather and held with cleats. The roof board is hinged or rolled but held in place with cleats and may be lifted off.

POULTRY NOTES

Rape makes a good crop for late green food.

Poultry is extremely profitable if properly handled.

Poultry, fruit and bees form a combination hard to beat.

Fowls have no sense of smell. They have nostrils, but no noses.

A cement floor in the laying pen and roosting closet is advisable.

Don't let fowls "get away" with your chicks, while you wonder what ails them.

Keep the males separated from the growing pullets. Both will develop better.

Ducklings generally begin molting when eleven weeks old and continue for about six weeks.

Don't forget that wet and leaky coops do not tend to produce healthy chickens, but early death.

It is a good plan to let all the breeding stock out of the yards to enjoy free range during the summer.

Don't try to breed from poor stock. It takes too long and good stock is cheap enough for you to start right.

Free range for the flock greatly simplifies the feeding problem, because the fowls can balance their ration, to a large extent, with the food they pick up.

Many Driven From Home.

Every year, in many parts of the country, thousands are driven from their homes by coughs and lung diseases. Friends and business are left behind for other climates, but this is not always a sure thing. A better way is the way of medicine—let us use Dr. King's New Discovery and cure your mother or grandmother used to cure our burns, boils, scalds, sores, skin eruptions, cuts, sprains or bruises. Ointment of sweet grease, its merit. Unrivalled for piles, corns or cold sores. Only 25c at A. M. Lewis & Co.

Ducklings hatched in June or July often lay all winter, while if hatched in March, they will lay in time to hatch ducklings from them by the 1st of October.

CHILD RESCUED FROM WELL

Woman and Three California Children Who Kept Their Heads Above Water.

Anaheim, Cal.—The three-year-old girl who clung to a board in the well without fuss, coolly awaiting rescue; the mother who leaped unhesitatingly into the well, without knowledge of its depth, to aid her child; the little five-year-old girl who ran three-quarters of a mile for aid; the boy who promptly rode to the well, worked his wife and quickly improvised a way for the rescue of the mother and child—each of the four are entitled to awards for heroism.

This was enacted at the Shannon Klucak ranch on the Santiago Canyon road. M. S. Ingram took his family to the ranch for the afternoon.

Answering the appeals of the children for a romp on the hillside, Mrs. Ingram after a short visit with her friend, Mrs. Klucak, went out with the little ones. Gathering around an old well covered with boards, the children were busily engaged in playing when one of them worked loose a timber on the well. Little Leona Ingram, aged three years, was standing on one end of the timber and her weight was sufficient to up-end it into the well. The child went down with it.

Mrs. Ingram, some distance away, witnessed the accident, ran to the well and leaped in after the child. She landed in the water fourteen feet below the surface of the ground and found the little girl clinging to the timber, which had become lodged between the walls of the well at the top of the water. The mother put one arm around the child and the other arm around the timber and in this manner held on until rescued.

LOCKED-IN MORGAN OFFICE

Robert Bacon and J. P. Morgan, Jr. Pry Way Out of Room With Knives.

New York, J. P. Morgan, Jr., and Robert Bacon, former ambassador to France, were prisoners for 20 minutes in the new quarters of 11 Pierpont Morgan in the Bankers' Trust building.

The two went up to inspect the new quarters, which are on the thirty-first floor, just before noon. A single door from the main corridor into the Morgan private suite, and Mr. Morgan slammed it without noticing that there was no knob on the inside.

When an inspection was completed the two men found themselves locked in. No telephones have as yet been installed. Mr. Morgan went to work with his pocket knife to turn the screws that hold the lock on the door. When he had loosened two of the screws he had broken all of the blades. Then the former ambassador to France set to work and unlabeled the remaining screws with scarcely less damage to his knife. They took on the lock, drew the bolt and were free.

The implicit confidence that many people have in Chamberlain's Colic, Cholera and Diarrhoea Remedy is founded on their experience in the use of that remedy and their knowledge of the many remarkable cures of colic, diarrhoea and dysentery that it has effected. For sale by all dealers.

Over Half-Century.

Hampreys' Specifics have been used by the people with satisfaction for more than 50 years. Medical Book sent free.
